

BOTHWELL-ACCURATE

E S T A B L I S H E D 1 9 2 7

Bothwell-Accurate Co. (2006) Limited is pleased to announce that we have now added Metal Siding, Metal Roofing and Metal Panels to our existing Sheet Metal Division. Don Alford has recently joined our team after 30 years with "Cem-Al Corporation" and will now be in charge of upgrading the sheet metal department to provide a wider range of sheet metal services.

Our existing supplier force has been improved to include all of the materials manufactured at Vic West, Agway, Roll Form Group, Kingspan, Reynobond, Alcoa, and Alpolic.

We now have the manpower that were directly involved to supply and install projects such as 25 York St., Telus Office Tower, Kolter Offices, BMO Barrie Computer Centre, Toronto Airport, Durham College Additions, General Motors Camero Plant and Ford Canada Oakville Updates to mention a few.

Whether you have a \$10,000.00 front entrance with columns, fascia and soffit only, or a \$900,000.00 multi floor cladding project, we can handle both with the same professionalism that Bothwell-Accurate has always provided. Do call Don for all your siding needs.
